

POLTER SHPK

AGENDA

- Introduction
- Seaport handling
- Your partner at the port
- Equipment
- Our services
- Board of management

INTRODUCTION

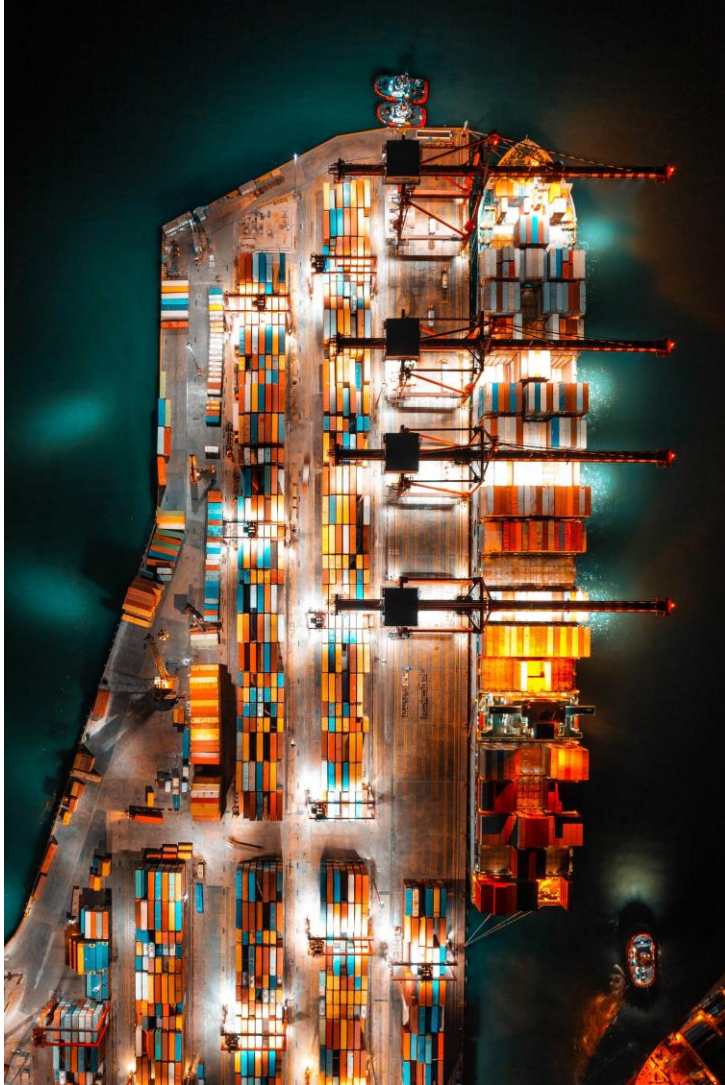

POLTER SHPK is a Limited Liability Company founded at 22/10/2014 in Albania, with head offices at Njesia Bashkiake nr. 5 Rruga Sami Frasheri, Komplexi “Nobis”, Nr. 2, Tirana.

The main scope of activity of POLTER SHPK is the organization of port logistics activities and custom activities, freight forwarding agency for the transport of goods, construction works, port deepening, container processing.

SEAPORT HANDLING

- Container handling at the seaport is our core business.
- Apart from that, we offer supplementary services on all areas relating to containers. From seaworthy packing to container depots, and from container maintenance to container repair.
- Our transport network links our seaport terminals in North and South Europe with the prestigious European economic regions.
- The key of our success is our ability to forge strong partnerships and alliances .

YOUR PARTNER AT THE PORT

POLTER SHPK maintains agency operations throughout Europe, through its strategic partnerships. We provide:

- ❖ 24/7 customer service
- ❖ Assistance for captain and crew
- ❖ Berth reservations
- ❖ Ordering of pilots, mooring lines and tugs
- ❖ One contact for all services

EQUIPMENT

The POLTER SHPK's extensive network enables efficiency due to the extensive network locations

POLTER SHPK offers optimized routes and reliable transport for all types of goods and raw materials.

The reason for this is our efficient terminal where all the core activities are handled in accordance to the latest standards.

Our special equipment is tailored for loading and uploading materials with unique properties that require special handling.

With the finest scanners, our team is able to record shipment data with efficacy and without errors.

The process is done for incoming and for ongoing goods which means each shipment is double checked for accurate tallies.

The scanning service is offered as well for the inventories of our customers.

EDI interfaces- electronic and fully automatic data exchanges- are used for complex transactions and high data volumes for swiftness and efficiency.

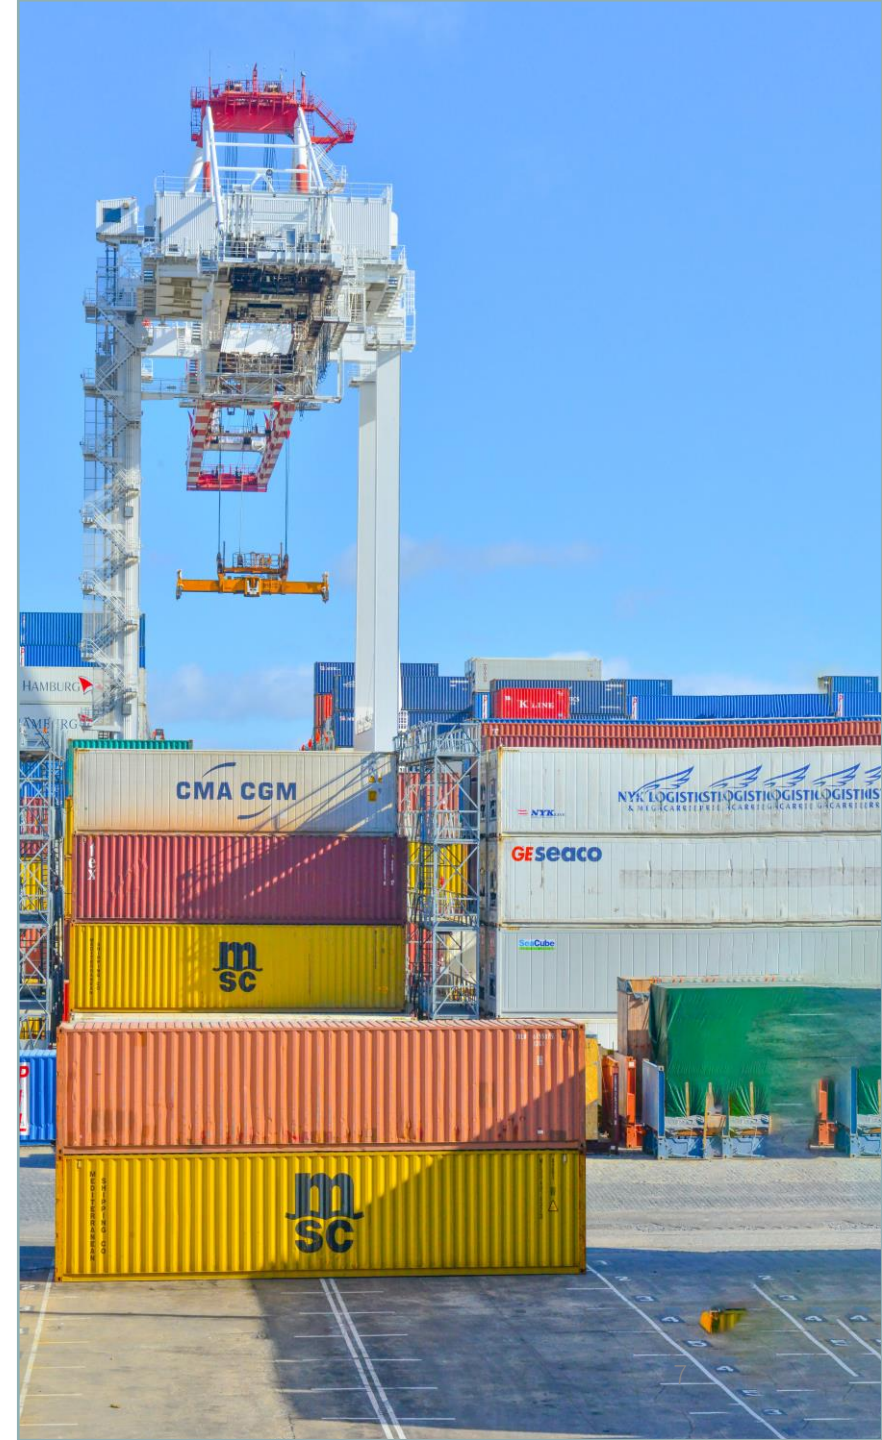

Most eminently, truck weighing results in significant time saving during dispatch as it is known that the time in ports is of the outmost importance.
